Keep track of the **number of skills completed** and **total time** Lexia Reading

Clicking skill name lets you view **student skills detail report.**

Easily see **progress in Lexia Reading** - what has been completed and what is left on current level.

Easily see where students **need instruction.**

Easily see the **number of repeats** needed to complete each skill activity

Easily see the **accuracy and rate** of work done compared to grade-level peers

- Easily view progress made in Lexia Reading over the course of use, including prior years (in comparison to the grade-level when skills are typically introduced)
- View student usage time in the current school year and last year, including average time per week.
- Displays the number of skills completed this year and last year and current benchmark status.
- Highlights student performance on skills in the current level
- View student's current level in use as well as completed levels with progress (% complete) and current unit. Number of repeats and total time within the activity is recorded as is accuracy (high, medium, low) and rate (fast, average, slow). Accuracy and rate are determined by comparing the number of repeats and total time to a set of grade-level peers in the Lexia database.
- Accessible from the Reports tab by selecting Student Skills Report or by clicking the Detail button on the Student Combined Report.
- Replaces the old Student Skills Report. However, the Pentagon or Spider Web portion of the old Student Skills report still displays in the Student Combined Report.
- No date selection – covers entire history of Lexia Reading use

Rate	Accuracy	Percentile of peer level sample
Slow	Low	1-24th percentile
Average	Medium	25-75th percentile
Fast	High	76th+ percentile
